LIST 2407

ROSES

BUDDED AND OWN ROOTS

This list offers the most complete line of both in the United States.

FACILITIES. My connections are unexcelled. In budded roses I market the entire output of three important growers. In own root roses I represent the largest grower in the country.

NOVELTIES. This list embraces the most up-to-date offerings in the country. I am now able to supply budded stock of many European Novelties simultaneously with their introduction abroad.

ABBREVIATIONS. The classes, H. T., H. P., etc., are too well known to need explanation. N. R. S. means National Rose Society of England. A. R. A. followed by figures refers to volume and page of American Rose Annual for further details. This is issued by American Rose Society to which everyone interested in roses should belong.

QUALITY. Everything offered is field grown and California grown. Eastern Nurserymen who have visited California know that our Hybrid Teas and Pernetianas are absolutely unequalled. The vigor is such that budded stock is now full grown and will need no further irrigation.

TIME OF SHIPMENT. Budded roses are all grown in Northern California. Growth is completed by June. They are ripened slowly during summer and can be dug and shipped beginning about November 1st. Own root roses are produced in Southern California. They grow all summer, are dug in December, and shipped beginning about Jan. 1st. Both can be shipped throughout the winter as we have no freezing weather. They will not stay dormant much after Feb. 15th, and for good results shipments should be made by that date or else packed and put in cold storage for spring shipment.

QUANTITIES. All prices are "flat" regardless of quantity.

Budded. Novelties listed at \$1.25 or higher may be ordered singly if desired. Varieties at 75c or less, not less than 5 of a kind.

Own Root. All varieties must be ordered in multiples of 10.

PACKING. On budded stock packing is charged for at cost of material. Own root roses are packed without extra charge.

TERMS. To buyers of known or established credit, 60 days net from date of shipment. Otherwise cash with order or 25% with order, balance C. O. D.

SHIPMENT. State explicitly whether you wish freight or express. In either case all shipments are carried at buyer's risk. Delay or damage in transit is up to transportation companies.

WHICH KIND? Be sure to show clearly whether you want budded or own root stock. This is important.

WHOLESALE ONLY. This list is for those who are legitimately in the trade and for no one else. Orders from anyone not in the trade will positively not be accepted.

BUDDED ROSES

Please read preliminary matter carefully.

Prices specified are for No. 1 grade. Second grade is not usually sold in advance but can be booked if desired at about one-third less on varieties listed at 75c or lower.

Budded roses are grown two years in the field (no "June buds") so of course are larger and heavier than own root stock.

ROOTS. The great majority are budded on Manetti. The other stocks used in limited quantities are La Grifferaie, Ragged Robin and Odorata.

CLIMBERS are grouped by themselves as a matter of convenience.

Dark crimson. Flowers large and well formed. Sweetly perfumed. Growth sturdy and upright. Continuous bloomer.

ELDORADO—Pern. (Howard & Smith 1922)

Flowers golden yellow of good size borne perfectly erect on very fine stems. A free bloomer and fragrant.

ELEANOR HENNING—H. T. (Easlea 1920)

A lovely shade of salmon pink. Buds long pointed. Flower large.

ELEGANTE—H. T. (Pernet-Ducher 1918)

Long sulphur-yellow bud, opening to a large, full flower of creamy yellow. Strong spreading growth; very floriferous. The finest formed rose of its color.

ELIZABETH CULLEN—H. T. (A. Dickson 1921)

Intense dark crimson. Buds long and pointed. Blooms semi-double with spiral center. Free flowering and exquisitely perfumed.

ETHEL JAMES—H. T. (McGredy 1921)

A single rose somewhat after the style of Isobel. The color is softer and deeper—carmine with yellow center. Growth bushy. Very deeply scented.

ETHEL SOMERSET—H. T. (A. Dickson 1921)

Shrimp pink, edge of petals deep coral pink. Flowers are very large, full, with beautifully pointed center, delightfully fragrant. Free blooming and good stems. Altogether a very fine rose.

ETOILE DE HOLLANDE—H. T. (Verschuren 1920)

Beautiful scarlet red. Very sweetly perfumed. Flowers large and semi-double.

EVENING STAR—Pern. (Morse 1920)

Golden yellow shaded apricot. A sport of Mme. Ed. Herriot and about the same except in color which is remarkably attractive. A vigorous grower.

FLORINDA NORMAN THOMPSON—H. T. (A. Dickson 1920)

Delicate rose on pale lemon ground which deepens at base of petals. Reflex is edged flesh. Persian Tea perfume.

FRAGRANT BOUQUET—H. T. (Howard & Smith 1922)

Delicate pink, yellow at base. As its name indicates it is both free blooming and fragrant.

FRANKLIN—H. T. (Pernet-Ducher 1918)

Salmon shaded yellowish salmon and strongly veined yellow. Very beautiful coloring.

GEISHA—Pern. (Van Rossem 1920)

 MARECHAL NIEL—N. Bright rich golden yellow. Large.

Do You Love Roses?

"Rose Gardening cultivates the taste, promotes acquaintance with refined people, and is favorable to health. It furnishes moderate outdoor exercise; it calms and quiets the nerves."

The American Rose Society Invites You to Membership

Organized in 1899 "to improve the excellence of the rose, and increase interest in its cultivation," this fellowship of rose fanciers now numbers more than three thousand, distributed in every State and Province of America, and in a score of foreign countries. The Society syndicates the information and enthusiasm of all who love the rose and makes it available to all its members. By bulletins, exhibitions, lectures, pilgrimages, an annual Rose book, and other publications, it interprets all that is helpful in Rose knowledge.

To Help You Grow Better Roses

Whether your garden be large or small, formal or informal, there is a place in it for roses, and there are roses for that place. Regular beds, the borders of pleasant walks, arched entrances to other garden delights, the magic circle about the sun-dial—all lend themselves splendidly to rose planting.

The publications of the American Rose Society, and the rose specialists available for consultation by the members, assure you success through up-to-date rose knowledge.
